

ELEVATE FITNESS CLUB

WHY I CHOSE THE GYM WEBSITE PROJECT

Milestone 1 Project

A responsive local business website focused on fitness, community, and usability.

Prepared by: Firdos Khan

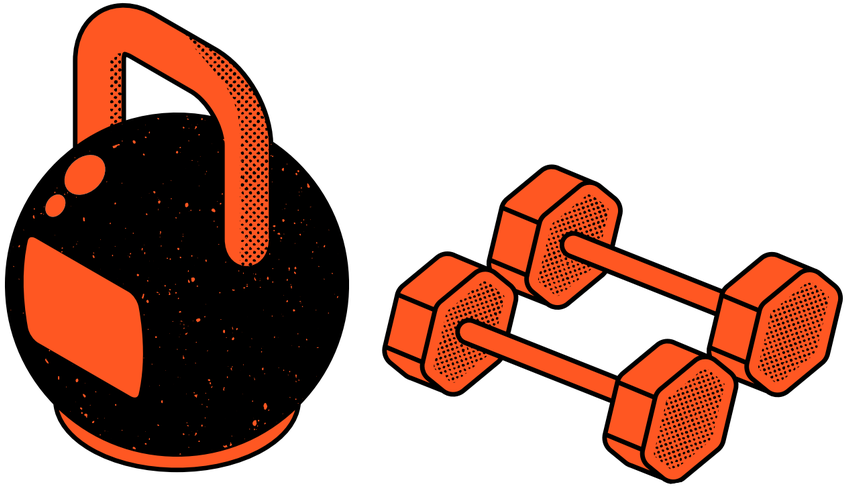

project overview

Introduction

Elevate Fitness Club is a responsive gym website designed to present fitness services, membership plans, training programs, and facilities in a modern and user-friendly way. The website helps visitors explore the gym, learn about its offerings, meet the trainers, and contact the club for membership enquiries.

Project Objective

The main objective of this project is to develop a professional, responsive, and accessible website for a fitness club. It aims to make gym information easy to find, showcase available services, display membership pricing, and encourage visitors to become members.

WHY THIS PROJECT?

Fitness is a practical, relatable business idea.

1. REAL-WORLD USE

A gym website can help visitors explore services, compare memberships, and contact the club.

2. CLEAR USER NEEDS

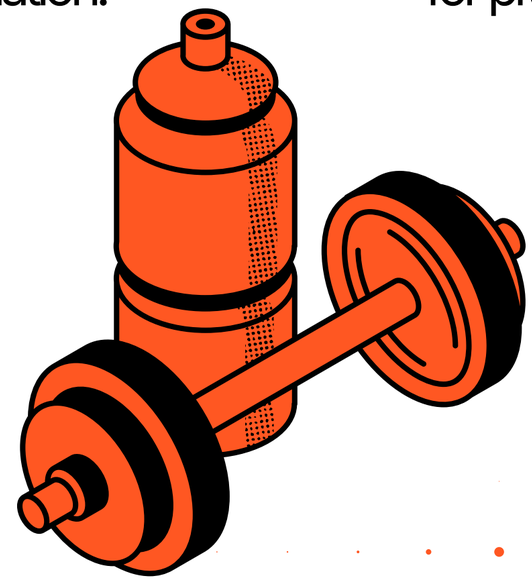

People need quick access to prices, opening details, training options, and contact information.

3. VISUAL DESIGN

Fitness photography and strong typography make it a good project for practicing a consistent UI.

Conclusion:

The goal is to build more than a visual page: a useful, responsive website for a local business.

AUDIENCE AND GOALS

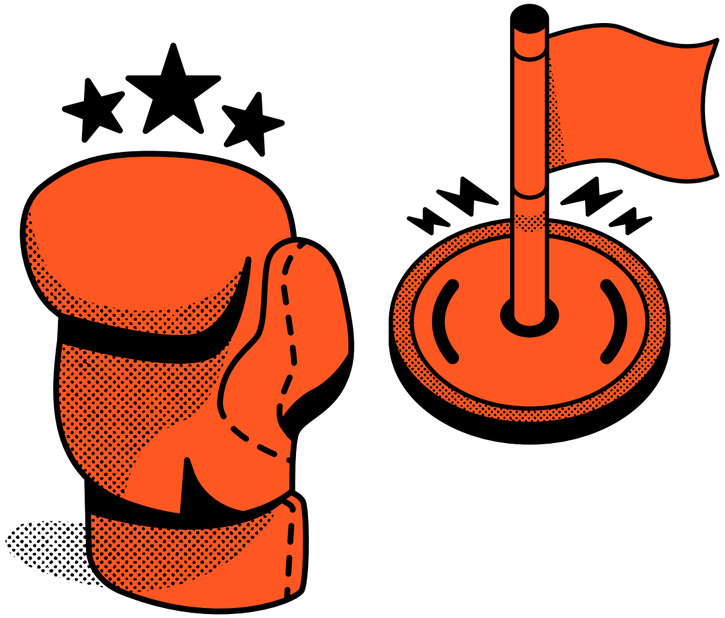

Designed around what a potential gym member needs.

TARGET USERS

- People exploring a new gym
- Beginners looking for guidance
- Members comparing services and plans
- Visitors who want to contact the club

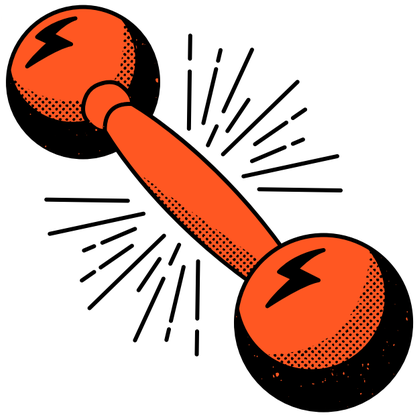

Primary Focus:

Clear navigation, readable content, and simple calls to action.

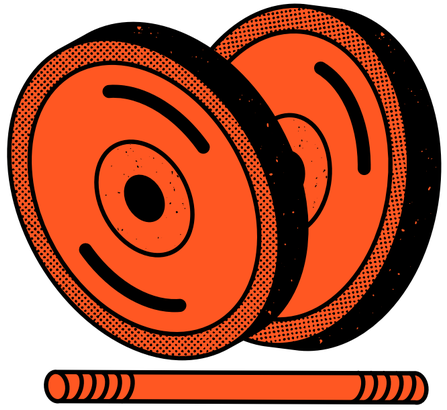

PROJECT GOALS

- Make information easy to find
- Present services and membership options clearly
- Work across mobile, tablet, and desktop
- Make contact and enquiry actions straightforward

WEBSITE STRUCTURE

A simple multi-page experience.

HOME

Hero, highlights, membership offers, testimonials.

ABOUT

Story, mission, and why choose Elevate.

SERVICES

Training options and service cards.

GALLERY

Responsive grid of gym and training images.

TEAM

Trainer profiles and areas of expertise.

CONTACT

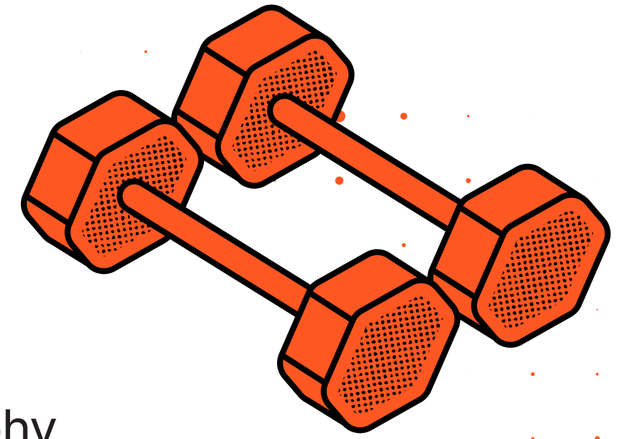

Contact details, map, and enquiry form.

Conclusion:

The structure separates key information so visitors can find what they need without clutter.

DESIGN DECISIONS

Bold, clear, and responsive.

VISUAL IDENTITY

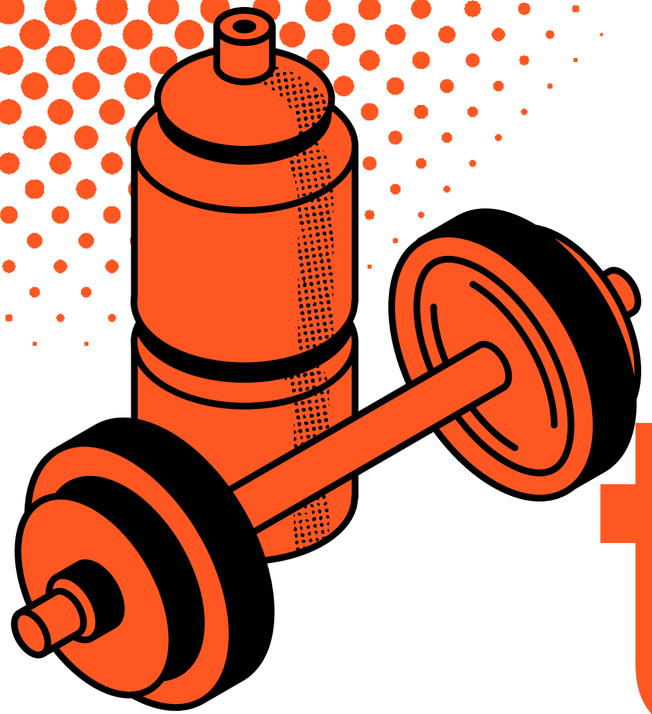

Black Orange White

DESIGN PRINCIPLES

- Consistent colors and typography
- Cards and grids for scannable content
- Flexbox for aligned rows and navigation
- Responsive layouts for smaller screens
- Visible hover and keyboard focus states

Conclusion: The project is an opportunity to practice semantic HTML, CSS layout, accessibility, and deployment

thank you!
